- **Uninterrupted** current - no or infrequent load switching requirements (maintains a lower contact resistance).

The SW300 features double breaking main contacts with silver alloy tips which are weld resistant, hard wearing and have excellent conductivity. Silver plating on the main contacts is standard for the SW300, however optionally it can be excluded from the specification. The SW300 is a compact contactor which can be busbar mounted vertically or horizontally, if mounted vertically the coil should be at the bottom.
